DETAILED ACTION

This application filed 11/22/2006 is a 371 of PCT/SE05/00004 01/05/2005.

Claims 1-11, 13, 15, 17-21 are pending and subject to the following Election/Restrictions.

Applicants response filed 04/25/2008 is acknowledged.

In view of the errors of the previously presented Restriction Requirement filed 02/25/2008 pointed out by the Applicant and in view of Applicants amendments to claims as well as consideration of Applicants remarks with respect to the two possibilities for the variable L1, the Restriction Requirement filed 02/25/2008 is withdrawn and the requirement is recast as follows:

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-11, 13, 18, 19, drawn to compounds of formula I wherein L1 is mono or bicyclic carbocycle **unsubstituted except for the direct attachment of the two nitrogens bearing R3 and R4 moieties.**

Group 2, claim(s) 1-11, 13, 18, 19, drawn to compounds of formula wherein

alternatively, the group $-N(R^3)-L^1-$ ~~or the group $-L^1-N(R^4)-$~~ together represent a saturated bicyclic heterocyclic ring containing from 2 to 9 carbon atoms and the nitrogen bearing R^3 or R^4 respectively

If this group is elected, election of species is required.

Art Unit: 1625

Group 3, claim(s) 1-11, 13, 18, 19, drawn to compounds of formula I other than compounds of Group 1 and 2.

If this group is elected, election of species is required.

Group 4, claim(s) 17, drawn to process of making compounds of Group 1

Group 5, claim(s) 17, drawn to process of making compounds of Group 2

Group 6, claim(s) 17, drawn to process of making compounds of Group 3

Group 7, claim(s) 15, 20 and 22 drawn to pharmaceutical methods of using compounds of Group 1

Group 8, claim(s) 15, 20 and 22 drawn to pharmaceutical methods of using compounds of Group 2

Group 9, claim(s) 15, 20 and 22 drawn to pharmaceutical methods of using compounds of Group 3

The inventions listed as Groups 1-9 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The invariant found in all these groups is 2-aminoquinoline structural core, a compound that is not a contribution over prior art CAS 580-22-3.

Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);

- (d) the prior art applicable to one invention would not likely be applicable to another invention;
- (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product

claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01. Any inquiry concerning this communication or earlier communications from the examiner should be directed to NIZAL S. CHANDRAKUMAR whose telephone number is (571)272-6202.
